

K-Love and Air One are syndicated national broadcast stations that provide me and my family with safe and positive radio stations to listen to. I like that I don't have to worry about the DJs making off color comments or using swear words. In this time of more obscenity being seen in broadcast communications, it's important to me that there something in our community that provides clean and positive broadcasts. If an LPFM channel were to displace K-Love, I would be very dissappointed, so please do not expand this service to allow it to displace current FM translator service.
